National Institute of Technology,
Arunachal Pradesh (NITAP)
(www.nitap.ac.in)

NIT Arunachal Pradesh is one of the 10 new NIT's established during the year 2010 by Ministry of Education (erstwhile Ministry of Human Resource Development, MHRD) Government of India. The institute is situated in the lap of river Papum and Pare engulfed by the Hills of lower Himalayan range. NITAP secured 160th rank in National Institutional Ranking framework (NIRF) and band a rank between 11th -25th rank among the category of institutes of National Importance, Central Universities and CFTIs in ATAL Ranking of Institutions on Innovation Achievements (ARIIA) 2020, MOE's Innovation Cell (MIC). In addition, NITAP has established academic and research collaborations with different International and National level institutes such as GIFU University, Japan, IIT Kanpur, Electronics Sector Skill Council of India (ESSCI) and North East Centre for Technology Application and Research (NECTAR) for conducting various entrepreneurship development programs for training, Research, collaboration and start up business models. Currently more than 1040 students are enrolled in the B. Tech, M. Tech and PhD courses of the institute.

National Science Day

National Science Day is celebrated in India on 28 February each year to mark the discovery of the Raman Effect by Indian physicist Sir C.V. Raman on 28 February 1928. For his discovery, Sir C.V. Raman was awarded the Nobel Award of Physics in 1930. The event is now celebrated all over India in schools, colleges, universities and other academic, scientific, technical, medical and research institutions.
